

## Verner

Il contenitore Verner assicura un elevato grado di componibilità, grazie a una serie di elementi multipli che, abbinati ad alcuni terminali, possono dare vita sia a forme rettilinee, sia ad altre più mosse. Poliedrico e funzionale, Verner è configurabile anche bifacciale, con ante apribili su entrambi i lati a creare un vero e proprio espositore da centro stanza.

The Verner storage unit is characterised by a free-standing frame. It offers a high level of modularity, thanks to a multiple series of elements which combined with end-units allow to create linear or winding configurations and shapes. Versatile and functional, Verner can also be requested as a double-face piece of furniture, with doors that can be opened on both sides for a storage piece to place in the centre of the room.
