Luxury Wallcoverings

## **MADE OF HANDMADE PLASTER CLOTH AND ONLY 1 MM THICK**

What surprises those who touch our product for the first time is its texture. Never before has a wall been seen that rolls up and does not crumble.

A natural, certified product made of quality raw materials and zero VOC emissions, in full respect of nature.

## **QUALITY CERTIFICATIONS**

Eco-sustainable and natural materials, healthy and comfortable living

Thanks to its composition based on natural raw materials, Affreschi & Affreschi wallpaper plaster is a healthy material, produced in compliance with European regulations, among the strictest in the world in terms of health and environment and equipped with all the certifications required for application in residential and commercial environments.

#### FIRE RESISTANT

The wallpaper plaster is certified Class B in the reaction to fire test, the best result from a wall covering according to EN ISO 11925-2, EN 13501 and EN13823.

#### GETS REVERBERATION REDUCED

Thanks to the porous structure, rich in materials that promote sound absorption, our wallpaper gets reverberation reduced. Tested in a reverberation room, according to UNI EN ISO 354: 2003.

#### HIGH THERMAL RESISTANCE

The thickness of 1 mm and the raw materials used to ensure that our frescoes have excellent thermal resistance (at the same level as a fir wood covering), certified according to EN 12667 and EN 12664.

#### WATERPROOF

It is a highly waterproof product. If it is to be installed in the shower, for additional protection, we suggest the application of a resin that makes it totally waterproof.

#### GREENGUARD COLOURS

The colors used to make our designs have a GREENGUARD GOLD certification, issued to products that improve air quality. This makes them suitable for application even in sensitive environments, such as restaurants, schools, and healthcare facilities.

#### ZERO VOC EMISSIONS

Wallpaper plaster helps to live in a healthy environment, thanks to its composition based on natural raw materials with zero VOC emissions (Volatile Organic Compounds).

#### FORMALDEHYDE FREE

Thanks to the composition of natural raw materials, the handcrafted textured wallpapers are completely ecological as they comply with the reference standard UNI EN 12149: 1999

#### ANTIBACTERIAL

The wallpaper plaster contains a sanitizing antibacterial gel that prevents the formation of mold, making the surface aseptic and ideal for a healthy environment.

## COMPOSITION

The difference can be seen and touched by hand

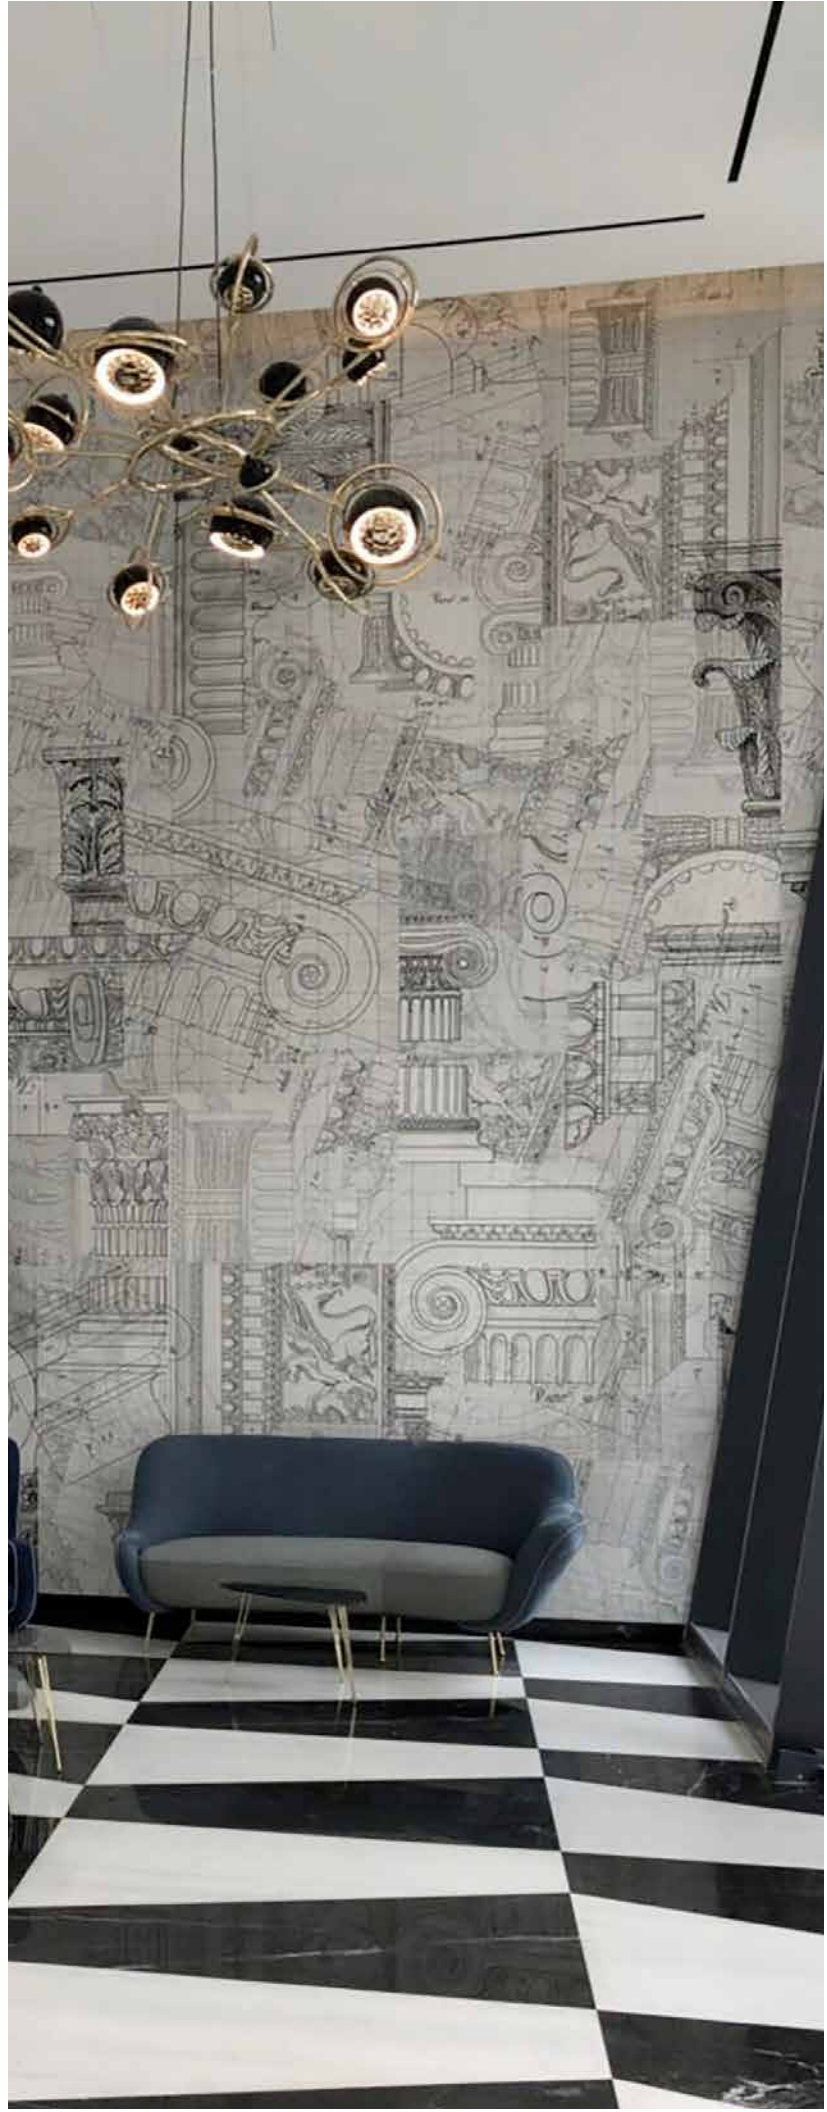

All the Affreschi & Affreschi designs are reproduced on fresh plaster sheets. It is, therefore, a special wallpaper, covered with a layer of plaster obtained with a mixture of 27 precious raw materials, among which Carrara marble and Roman travertine, on which the masterpieces of Italian art history have been carved. Imagine having the marble chips fallen while Canova, Michelangelo, Bernini, and Raphael sculpted the works that made them the greatest in the world. Nowadays, with the same material, we get your walls covered to make them real masterpieces.

The output is a natural surface, to the touch and to the sight, that evokes that of the ancient frescoes made to measure and finished with care in every detail so that the chosen design emerges in all its beauty.

## REALISATION

Customizable and bespoke designs: the luxury of uniqueness

From colors to dimensions, from subjects to inspirations: each design is a sartorial, lively, human project. Each product is customized and modulated to measure, taking into account every need (presence of doors, windows, furnishing accessories) and can always be previewed, when ordering, with a graphic draught of the customized project.

## CHARACTERISTICS

The strongest surface ever created for wall coverings

The standards of comfort and resistance to wear, water and dust of our handmade wallpapers are very high: they do not crease, do not detach and, with their porous surface, naturally breathable and free of plastic materials, they leave the wall free to breathe, favoring the necessary recirculation of oxygen between the external and internal environment.

## ATTENTION TO DETAIL

We have a keen eye for detail

Our handcrafted plaster has the largest format ever seen in the wallpaper craft: up to 160 cm x 500 cm for each sheet. These dimensions not only considerably reduce the number of joints and guarantee optimal aesthetic performance but also limit a very common defect in wallpaper: the misalignment between the various panels. To remedy this, a further step that we always carry out during the production phase is a scrupulous control of the image along the joints: if any imperfections are found, our masters intervene with targeted manual touch-ups to guarantee homogeneity to the final image.
