ENTRE-DEUX

A flush jamb system that is based on the concept of metal intradoses on facades and turns it into an interior solution.

Type

Hinged without basic door frame, Flush-effect hinged door, Hinged door and frame

Designed By

Alfonso Femia /AF*Design

Description

Entre-Deux is a flush jamb system that can mark out spaces, open passageways, and create the intradoses in various materials. It was engineered by applying a versatile, modular approach to allow extreme configurability and customisation. The Entre-Deux hinged door system can dialogue with the intrados' space that can be flush with the wall or protruding. It can also be transformed into signage through a lit-up frame or clad in various materials such as marble, metal, or wood.
