

# CÉLINE

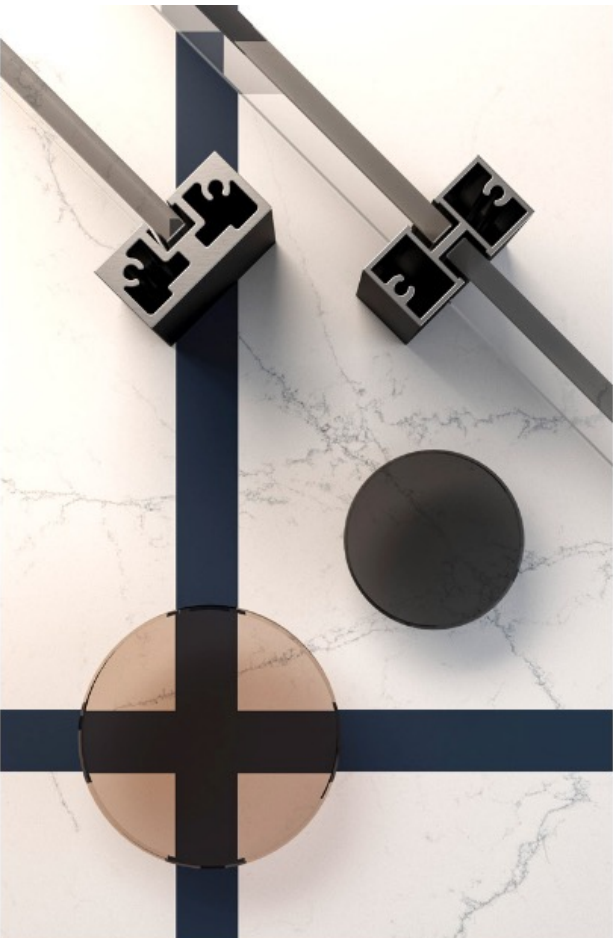

The geometric elegance of the 1900s style decorations provides a complete technical system, suitable for any design need.

## Type

Partition wall, Sliding, Hinged without basic door frame, Flush hinged, Pocket door, Hinged door and frame

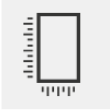

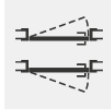

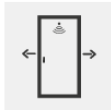

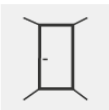

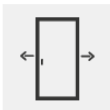

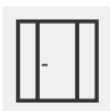

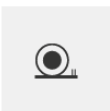

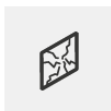

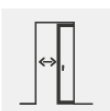

## Designed By

Paolo Festa

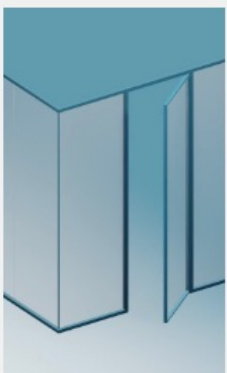

The Céline system is based on the industrial windows of the early 20th century, bringing tradition into a contemporary setting. The minimal rectangular profile is fitted with aluminum plates that can hold combinations of glass with different finishes to form elegant decorative geometric features. This complete system satisfies multiple design needs, from classical hinged or sliding doors, through to real partition walls, thanks to the framing solution.

## Technical details

	Opening of the hinges 180°		Telescopic jamb		Adjustable hinge		Jambs in aluminum
	Magnetic lock		Installation on brick or plasterboard		Custom-made		Version to pull and to push
	Single glazing		On/off glass		Lock may be inserted		Automatic door with Faac rail
	Corridor door		Automatic door with Faac rail		Porte coulissante		Pivot door
	Swing door		Partition wall		Slow-Motion		Safety glass
	Possibility of all height door		Built-in rail with upright ceiling		Pocket door		

## Type

Partition wall

Sliding

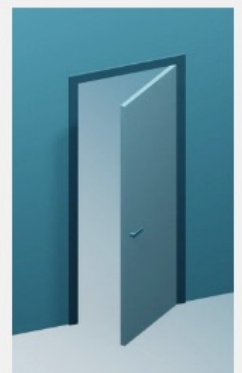

Hinged without basic door frame

Flush hinged

Pocket door

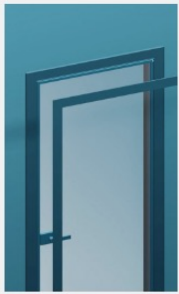

Hinged door and frame

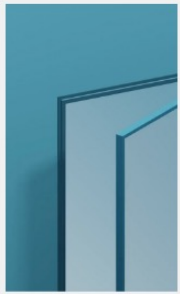

## Combinable jambs

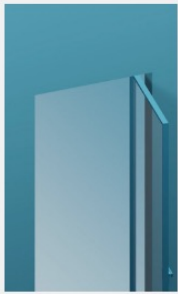

Jamb 45°

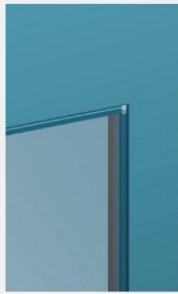

Customizable jamb

Slim jamb

Pivoting flush door

Flush door with external hinge

Double frame corridor

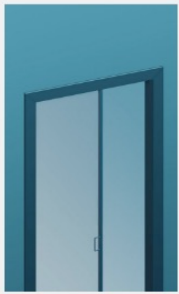

Single frame corridor

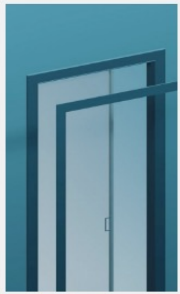

Frame system

Without jamb

Jamb 45°

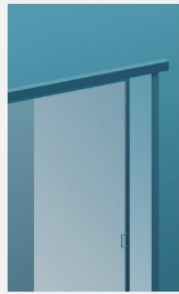

Customizable jamb

Slim jamb

Built-in rail

Wall-mounted rail

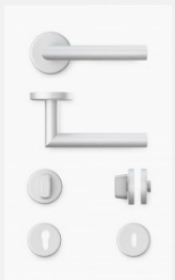

Ceiling-mounted rail

Pivoting corridor

## Handles
