

# LEVEL

The flush visual effect, with the ease of installation of a traditional hinged door.

Type

Flush-effect hinged door

Designed By

Paolo Cappello

Level is a hinged door with very clean lines, but with a particular feature that makes it unique: when it is closed the panel covers the frame completely. A traditional hinged door, with the final visual effect like that of a flush door. A single door panel that covers the frame when closed, leaving a minimal protrusion in relation to the wall surface. This easy to install solution, without any special work required, is suitable for a standard door space with a counterframe.

## Technical details

Opening of the hinges 180°

Telescopic jamb
