

# RI-VISTA

The complete system for a five star walk-in closet.

Type

Bookcases , Walk-in closet

Designed By

CRS ALBED

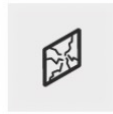

Ri-Vista is a modular, personalizable system for creating sophisticated walk-in closets. The construction solution applied, which involves uprights fixed to the wall at the bottom, makes it possible to install a back panel, which gives a refined aesthetic effect, without overlooking easy maintenance. The sophisticated ceiling and floor rail system can be used, where needed, to create container modules that can slide and rotate, thereby providing an ingenious storage solution for dividing and organizing spaces, without foregoing flexibility.

## Technical details

Custom-made
