

MORBIDA

A collection that reinterprets classic solutions thanks to a dynamic and elegant graphic sign

Designed By
FABRIZIO CESTER

The Morbida collection provides a modern reinterpretation of the classics by offering a unique insight into the integration of doors in interior architecture. The aluminum jambs, rounded and projected outward, connect the wall plane with that of the door panel, offering a typical detail of flush realizations while still not betraying the stylistic setting of the traditional classic jamb. Available in different finishes, it can blend in with the wall or create a contrast and thus it characterizes the environment in which it is placed.

Technical details

	Opening of the hinges 180°		Telescopic jamb		Adjustable hinge		Jambs in aluminum
	Magnetic lock		Installation on brick or plasterboard		Custom-made		Version to pull and to push
	Double glazing		Lock may be inserted		Swing door		Slow-Motion
