

SUIT

A flush door system with a high degree of configurability at the designer's disposal.

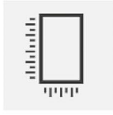

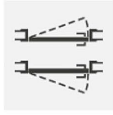

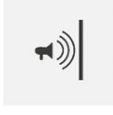

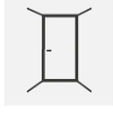

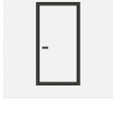

Designed By

CRS ALBED

Suit is a flush door system with concealed hinges that offers many configuration options to the designer. An almost invisible aluminum frame houses finishing panels in ceramic, glass, wood, or other materials up to 6mm thick, enabling greater coordination with the architectural environment. Ideal for flush installation with boiserie, the 60mm-thick door panel provides strength and technical performance. Suit is characterized by versatility and customization, meeting complex design requirements without compromising aesthetics or functionality. Suit door panels can weigh up to 286 lb.

Technical details

	Opening of the hinges 180°		Adjustable hinge		Jambs in aluminum		Magnetic lock
	Installation on brick or plasterboard		Custom-made		Version to pull and to push		Built-in door closer
